

Transparency, Efficiency & Centralized Stock Management

Zenoti Inventory gives you a bird's eye view of your stock levels across multiple locations, empowering management to keep costs down and save your organization serious time.

Stock management, simplified

Zenoti makes stock audits easy, giving your teams full visibility into your stock levels at all times. Simply scan barcodes to update quantities, and let stock level alerts inform you when stock hits your order levels.

Grow business with centralized inventory management

Managing inventory across multiple locations is time-consuming and fraught with error. Zenoti gives you clear visibility into stock levels across all locations, so you can track and direct inventory as it moves from the warehouse to locations as well as between locations. Centralized inventory management gives you and your team more time — so you can focus on the bigger picture.

Manage profitability with deep reporting features

Make informed business decisions with Zenoti's robust reporting features. Identify your most popular products, as well as slower-moving products, to maximize profitability. Track retail sales and plan your marketing initiatives based on solid data.

A full suite of inventory features

Retail Bundles

Build gift baskets from individual products or sell items individually.

Stay Notified

Stock level alerts keep you informed about changing stock levels.

Integrations

Integrate with systems like Shopify, NetSuite, SAGE, Navision and SAP.

Reduce Leakage

Zenoti reports on expected stock levels. Compare expected versus actual stock levels to identify discrepancies or possible theft.

Track Bill of Materials

Zenoti tracks professional product usage, so you can ensure service SOPs are followed and avoid costly overuse of products.

Manage Back Orders

Collect payment on an out-of-stock item and deliver to the customer when it's available again.

Pre-filled POs for faster operations

Zenoti generates pre-filled purchase orders for each supplier with desired quantity levels, so your team doesn't have to waste time creating POs from scratch. Just verify or make small adjustments to each PO, and speed up the ordering process.

Streamlined deliveries

Use Zenoti Mobile to scan product deliveries as they arrive, and verify products and quantities against the relevant PO. If the order is complete, the PO is automatically closed — and stock levels are automatically synced across your entire system.

Get Zenoti Inventory and revolutionize your stock management processes.
